

EM - ANIMAL PROBIOTIC

EM is a naturally fermented liquid probiotic utilising "effective micro-organisms". The microbes in EM are non-harmful, non-pathogenic, not genetically-engineered or modified, are not chemically-synthesized and are biodegradable.

EM technology is far superior to regular probiotics, which are typically lactic acid bacteria in high dosages. EM comprises an entire consortium of the exact same microbes that animals would naturally receive.

Correct EM-probiotic dosage will greatly optimize:

- ✓ Maximum digestive efficiency
- ✓ Improved feed conversion ratio
- ✓ Quality of developing bone.
- ✓ Maintaining healthy body weight
- ✓ Maximising the immune system
- ✓ Combating illness and ailments

DOSAGE:

Double dose during high stress times or if on medication.

- Horses - 25ml daily over feed
- Large/Medium dogs – 1 Tablespoon daily over cool food
- Small dogs/Cats – ½ Tablespoon daily over cool food

SPECIES LIST: Bifidobacterium animalis subsp.lactis, B.bifidum, B.longum, Bacillus subtilis, Lactobacillus acidophilus, L. buchneri, L. casol, Lactococcus lacti ssp, Lactis biovar diacetylactis, L lactis, Lactobacillus fermentum, L. plantarum and Streptococcus thermophilus.

INGREDIENTS:

Purified/structured water, Organic Sugar Cane Molasses, Latic Acid Cultures, Mineral Powder, Sea Salt, Juice concentrates, Rice Bran Liquid Extract.
